Birth: 6 Sep 1982

ABOUT ME

Software programming and architecture since 2002, and team leadership for about 14 years, but addicted to coding and, of course, OpenSource activities since 2012. Please review my profile on <https://github.com/pylover> before contacting me.

WHAT I LIKE TO DO

- Software architecture and design.
- Software Project Management
- SaaS, SOA, Cloud Computing and API design.
- REST API and Backend development.
- Team leadership and Technical coaching.
- System and low-level programming.
- Software profiling, reverse-engineering and optimisation.
- Site reliability engineering.

RECENT EXPERIENCES

BHRCo, Tehran — Team Lead

2024 - 2025

C, C++, and QT: SIEM (Security Information and Event Management) development and architecture.

ESMCell, Tehran — CTO (IoT dep)

2022 - 2024

C, Linux, Embedded, MCU and electronics circuit design to achieve products such as LTE modems, telecommunication test and benchmarking appliances, smart building and wizard systems for incidents like fire-alarms, earthquake, etc across the NarrowBand IoT network.

Alibaba (travel-co), Tehran — Technical Talent Coach

2021

Manager of Alibaba Academy and Tech recruitment.

Kavosh, Tehran — CTO

2017 - 2020

Core-banking and security, offline TOTP (time-based one-time password generation) using a mobile app and verification by banking switches for all kinds of transactions, online, POSes and ATMs for the first time in Iran, which is owned by BMI(Bank Melli Iran), using (RFC6238), and used by 6 other banks after success.

Farakav, Tehran — Senior Software Engineer

2015 - 2016

Backend software development and architecture to design a GEO-optimised CDN

PROFICIENT IN

C, C++, Python, Go, Haskell, JavaScript.

Testing and Quality Assurance.

Distributed computing.

HTTP 1/2, REST API

Team Working, Git, CI/CD

Library and framework authorship.

Versioning and Backwards Compatibility.

High Load Systems and SRE.

Kernel and System Programming.

Linux, FreeBSD, Shell Scripting.

Non-blocking IO & Async programming.

Security, Cryptography and TLS.

Network Programming and Protocols.

High availability and Scalability.

Caching, Invalidation and Race Condition.

Database, ORMs, RDBMS & No-SQL.

Scrum, Agile and XP methodologies.

OTHER SKILLS

.NET Framework, .NET Core and C#.

Electronics, Design and Development.

Server Administration, Debian family.

API Gateway and ESBs.

Telecommunications, FD, TD, LoRa and Narrowband IoT.

QUIC Protocol (RFC9000).

SOCIAL PROFILES

github.com/pylover

linkedin.com

stackoverflow.com

[Unix & Linux](https://unix.org)

askubuntu.com

serverfault.com

for the varzesh3.com and tamasha.com services.

OPEN SOURCE

I've many open-source projects related to web frameworks, asynchronous I/O engines, content delivery networks, logging, configuration, BDD testing frameworks, and online ASCII diagram authoring, which you can check on my [GitHub page](#).

OTHER ACTIVITIES

Music, Theory, Playing and Composing.

Mountain Climbing and Nature.

3D Printing.

Electronics and IoT hobbies.
